CAREER OBJECTIVE

To secure an entry-level position as a Software Developer specializing in WAMP Stack (Windows, Apache, MySQL, PHP) development. Eager to apply my skills in PHP backend scripting, database design, JavaScript, and desktop integration to build optimized, real-world solutions while continuously enhancing my problem-solving capabilities.

TECHNICAL SKILLS

Backend Development (WAMP): PHP (OOP & Procedural), Apache Web Server, Windows Environment

Database Management: MySQL, SQLite, PostgreSQL, Database Design (ER Diagrams, DFD)

Frontend Technologies: HTML5, CSS3, Bootstrap 5, JavaScript (ES6, AJAX, Fetch API)

Desktop App Development: Electron.js (integrating HTML/CSS/JS with native desktop features)

Tools & Libraries: PHP Mailer (SMTP), Chart.js, Cropper.js, Figma, Canva, Git/GitHub, VS Code

Software Concepts: SDLC, Object-Oriented Programming (OOP), UI/UX Design Principles

PROJECTS

LADDOO WEBSITE & ADMIN DASHBOARD | Custom-built full-stack e-commerce store and admin control panel optimized on a WAMP stack.

Tech Stack: PHP (OOP), MySQL, JavaScript (ES6, AJAX/Fetch), Bootstrap 5, HTML5/CSS3, PHP Mailer, Chart.js, Cropper.js

Secure Auth & Onboarding: Developed user registration with SMTP-based email OTP verification (PHPMailer) and secure password recovery.

Asynchronous UX (AJAX): Implemented page-reload-free cart operations, wishlist/favourites toggle, and dynamic search suggestions.

API & Geolocation Integrations: Integrated India Post API (address auto-fill) and browser Geolocation API (admin traffic mapping).

Admin Panel & Performance: Built Chart.js metrics, catalog CRUD, and WebP compression pipeline (GD library) reducing page load time by 80%.

MEDIBILL PRO | A high-performance offline retail pharmacy billing and stock management application.

Tech Stack: React, TypeScript, Electron.js, Node.js, Express, SQLite, CSS3.

Architected Electron.js shell running a React UI with a sandboxed Node/Express backend.

Developed fast billing workflow with hotkeys, automatic CGST/SGST calculation, and receipt printing.

Secured local environment using JWT-authenticated APIs and offline security questions for reset.

Built smart inventory tracking featuring batch-level expiry alerts, low-stock triggers, and CSV imports.

TYPING APP | Bilingual Desktop Typing App.

Tech Stack: Electron.js, Node.js, JavaScript (ES6+), HTML5, CSS3, Electron-Builder, Local Storage.

Desktop Packaging: Built a native Windows application (.exe installer) using Electron.js and Electron-Builder.

Bilingual Layouts: Implemented English (QWERTY) and Hindi (Mangal In script) typing layouts with an interactive virtual keyboard.

Error-Lock Engine: Developed a strict typing engine that halts cursor progress on typos to enforce correct finger placement.

Weakness Analysis: Used Local Storage to track mistyped words and automatically generate custom drills for target practice.

EDUCATION

Master of Computer Applications (MCA) | Institute of Computer Science and Technology(ICST), SHEPA, Varanasi

2024 – 2026

Bachelor of Computer Applications (BCA) | School of Management Sciences (SMS), Varanasi

2021 – 2024

CERTIFICATE

OCI 2025 Certified AI Foundations Associate – Oracle University

PERSONAL DETAILS

Languages Known: English, Hindi

Current Location: Varanasi, UP
